Marlboro Avenue Utility and Road Construction

The Town of Easton will be performing road construction on Marlboro Avenue from the Easton Parkway, MD. Rte. 322, to 900 feet east beginning Monday, April 15th 2013. The purpose of the project is to add an additional travel lane in order to upgrade left-turning vehicle movements into the Tred Avon and Easton Marketplace Shopping Centers. Easton Utilities will also be installing new electric conduits for the future replacement of a major feeder to this commercial district. The contractor for this project is Dixie Construction of Georgetown Delaware. There will be crosswalks, pedestrian signals, traffic signal improvements, additional storm drain improvements and asphalt resurfacing through the construction zone.

There will be daytime lane closures in the immediate work zone area during this project at various times. Some of the traffic signal construction will occur during non- peak travel night hours. The complete project duration is 120 days.

If you have any questions, or concerns please contact Brian Hause at 410-822-2525 ext. 138. We apologize for any inconvenience and thank you in advance for your cooperation while we work to improve the quality of our streets, pedestrian safety and the accessibility to the shopping centers.
